

# SYNTHETIC MELANOMA PATHOLOGY REPORT

RESEARCH FIXTURE - NOT A REAL PATIENT - NOT FOR CLINICAL USE

Document ID: MEL-201-A

Report date: 2026-08-22

## CURRENT SPECIMEN - SYNOPTIC SUMMARY

|                                       |                                             |
|---------------------------------------|---------------------------------------------|
| Procedure                             | Excision                                    |
| Specimen site                         | Left scalp                                  |
| Diagnosis                             | Invasive melanoma, lentigo maligna melanoma |
| Breslow thickness                     | Approximately 1.1 mm                        |
| Ulceration                            | Not identified                              |
| Mitotic rate                          | 2 per mm2                                   |
| Invasive melanoma - peripheral margin | Not involved                                |
| Invasive melanoma - deep margin       | Not involved                                |
| Melanoma in situ - peripheral margin  | Not involved                                |
| Melanoma in situ - deep margin        | Not involved                                |
| Reported pT                           | pT2a                                        |

## ADDITIONAL CURRENT-SPECIMEN FINDINGS

Tumor-infiltrating lymphocytes are nonbrisk.
